Arctic Ultraflex Blue®

Premier Cold Weather Flexible Extension Cords

Designed for unbeatable performance in the most demanding conditions

Tough, durable Polar Wire **Extension Cords** are designed for easy handling and superior performance in cold weather applications. The SEOOW ***Arctic Ultraflex Blue®*** jacket stays flexible to -50°C and won't become stiff or crack, even in extreme temperatures. Excellent abrasion resistance. Clear molded ends with steel retention rings light to provide instant power verification. Select from our length and gauge configurations, or specify custom sizes and colors to suit your needs (minimums apply.)

- ***Our rugged cords OUTPERFORM and OUTLAST the imitators***
- ***Proven dependable in the worst winter weather***
- ***Industrial grade, contractor quality***
- ***Heavy duty molded-in blades fit tightly so water won't penetrate***
- ***Exceptionally easy to handle —won't tangle or kink***

Typical Cord Legend

Arctic Ultraflex Blue® E224869 W
12 AWG (3.31mm2) 3/C SEOOW (UL) 600V
105C (-50C) -- CSA 265576 SEOOW 600V
105C (-50C) FT2 WATER-RESISTANT

Features

- Superior flexibility to -50°C (-58°F)
- Class K fine stranded 100% copper construction
- Resists water, oil, grease, salt, chemicals, abrasion, sunlight, weather
- Clear NEMA 5-15 and 5-20 molded ends light when energized
- Steel retention rings provide extra security and strain relief
- Reinforced blades and pins
- UL and CSA Approved
- Flame retardant (VW-1)
- Environmentally safe
- Made in the USA

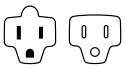

-55°C TO 105°C

PROUDLY MADE IN THE USA

RoHS compliant

Standard NEMA 5-15 Cords – 12 and 14 AWG

Part Number	AWG	Length
